

Thanks to family caregivers, 65 million people get the help, comfort and support they deserve.

November is National Family Caregivers Month

Day in and day out, family caregivers in the U.S. fulfill a vital role in patient care. After all, no one else is in a better position to ensure continuity of care, because family caregivers are the most familiar with their care recipients' treatment, medicine regimens, as well as dietary and exercise needs and concerns. This November, National Family Caregivers Month is a time to raise awareness and support for family caregiver issues. Find out more at TheFamilyCaregiver.org.
