

Employer Savings Stack Up with Allsup Healthcare Insurance Services

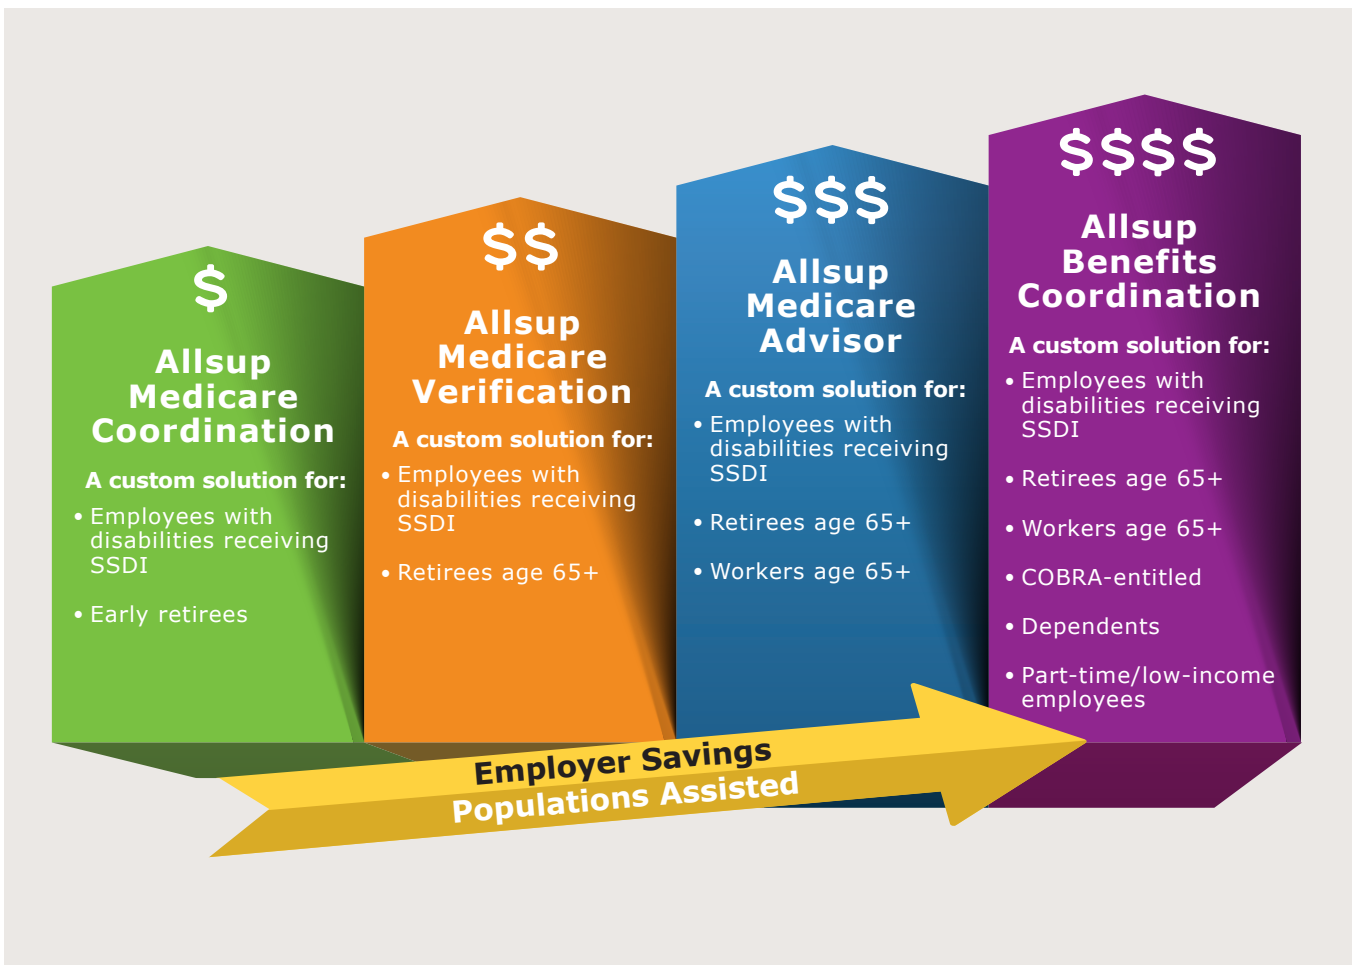

Allsup Healthcare Insurance Services can help your organization significantly reduce group health plan costs. Four customized solutions are available to assist your organization with insurance transitions and provide maximum potential for savings.

Allsup Medicare Coordination

Your organization can decrease claims costs and save thousands of dollars by becoming secondary payer to Medicare. We handle and complete this essential process for you by submitting a Payer Status Update (PSU) request to the Centers for Medicare and Medicaid Services (CMS).

Allsup Medicare Verification

We can help your organization smoothly transition retirees to your private healthcare exchange by properly enrolling them in Medicare Parts A and B. Our specialists identify eligible plan participants, verify Medicare status and provide access to Medicare enrollment experts.

Allsup Medicare Advisor

A convenient solution for Medicare coverage transitions. If your organization does not offer or has decided to phase out retiree coverage, consider using Allsup Medicare Advisor. We ensure that your Medicare-eligible participants receive guidance and support to make informed and confident Medicare choices from many available plan options.

Allsup Benefits Coordination

When your organization needs to move individuals from your group health plan to other healthcare insurance options, Allsup Benefits Coordination is a key resource. Expert guidance can benefit both large and small organizations when special population groups are being transitioned to Medicare, Marketplace exchange plans and Medicaid coverage.

The Allsup Advantage

Allsup has a 30+ year history of successfully coordinating private and public disability and health insurance benefits for hundreds of thousands of individuals and their families, their employers and their insurers. Our goal is to simplify complex government programs and information so your organization and employees can make satisfying decisions that have a positive result.
