Lupus Foundation of America CME program

Leading researchers and clinicians in the field of lupus will discuss advances in the management and treatment of lupus with a focus on:

- Advances in Pathogenesis and Genetics
- Lupus Outcomes: Bones, Heart, Cancer
- State of Lupus Treatment

Target Audience

This activity is designed to meet the continuing educational needs of specialists in rheumatology, immunology, internal medicine, and family practice. Physician Assistants may also benefit from this activity.

Activity Goals

This activity is designed to address the following ABMS / IOM competencies: Patient Care and Medical Knowledge

Learning Objectives

After attending this activity, participants should be able to:

- Discuss the challenges of diagnosing lupus and how we define the disease.
- Identify the key advances in our understanding of lupus pathogenesis.
- Articulate and describe the most current research in lupus genetics.
- Identify the risk factors for bone loss and the approaches to prevention and management in patients with lupus.
- Identify the risk factors for premature heart disease in lupus and the suggested management strategies.
- Identify the risk factors for cancer in patients with lupus.
- Discuss the approach to treatment of lupus.
- Describe the rationale and evidence to support the use of biologic therapies in lupus.

This activity has been approved for AMA PRA Category 1 Credit(s).[™]
